Makrolon® Rx2235

Introducing
Makrolon®
Rx2235

Going to greater lengths of innovation

We continue to develop our products to meet your design needs. This newest innovation of high flow material, along with Makrolon® 2258, extends our medical portfolio options to give you a broader range of polycarbonate choices.

23% increase in flow length

Going to greater lengths of innovation

We continue to develop our products to meet your design needs. This newest innovation of high flow material, along with Makrolon® 2258, extends our medical portfolio options to give you a broader range of polycarbonate choices.

Design matters

Our latest polycarbonate meets the toughest device design challenges, allowing for intricate features and thin walls while enabling longer flow length.

Going to greater lengths of innovation

We continue to develop our products to meet your design needs. This newest innovation of high flow material, along with Makrolon® 2258, extends our medical portfolio options to give you a broader range of polycarbonate choices.

Design matters

Our latest polycarbonate meets the toughest device design challenges, allowing for intricate features and thin walls while enabling longer flow length.

Value-able

Makrolon® Rx2235 fills very thin walls and accurately replicates intricate features with lower pressures. Higher flow materials like Makrolon® Rx2235 are also needed when cost and productivity mean multi-cavity tools.

Sterilization as you choose it

While our high flow Makrolon® 2258 is easy to sterilize with standard methods, the new Makrolon® Rx2235 is designed to also be sterilized using gamma and e-beam methods.

Value-able

Makrolon® Rx2235 fills very thin walls and accurately replicates intricate features with lower pressures. Higher flow materials like Makrolon® Rx2235 are also needed when cost and productivity mean multi-cavity tools.

High standards meet high flow

Formulated specifically to meet rigorous healthcare industry requirements*, we take pride in the global consistency, quality and reliable supply of our polycarbonate materials.

* Biocompatibility: ISO 10993-1 and USP Class VI for contact of 30 days or less

The manner in which you use and the purpose to which you put and utilize our products, technical assistance and information (whether verbal, written or by way of production evaluations), including any suggested formulations and recommendations, are beyond our control. Therefore, it is imperative that you test our products, technical assistance and information to determine to your own satisfaction whether our products, technical assistance and information are suitable for your intended uses and applications. This application-specific analysis must at least include testing to determine suitability from a technical as well as health, safety, and environmental standpoint. Such testing has not necessarily been done by us. The biocompatibility testing referenced above cannot assure the biocompatibility of final or intermediate products made from Covestro products or the suitability of such products for their use in a Medical Application, i.e., the test data cannot be used to conclude that any medical devices manufactured from the Covestro products meet the necessary requirements of ISO Standard 10993-1. It is the sole responsibility of the manufacturer of final end-use product to conduct all necessary tests, including biocompatibility tests and inspections and to evaluate the final product under actual end-use requirements.

Unless we otherwise agree in writing, all products are sold strictly pursuant to the terms of our standard conditions of sale which are available upon request. All information and technical assistance is given without warranty or guarantee and is subject to change without notice. It is expressly understood and agreed that you assume and hereby expressly release us from all liability, in tort, contract or otherwise, incurred in connection with the use of our products, technical assistance, and information. Any statement or recommendation not contained herein is unauthorized and shall not bind us. Nothing herein shall be construed as a recommendation to use any product in conflict with any claim of any patent relative to any material or its use. No license is implied or in fact granted under the claims of any patent.

Nothing herein shall be construed as a recommendation to use any product in conflict with any claim of any patent relative to any material or its use. No license is implied or in fact granted under the claims of any patent.

These values are typical values only. Unless explicitly agreed in written form, they do not constitute a binding material specification or warranted values. Values may be affected by the design of the mold, the processing conditions and coloring/pigmentation of the product. Unless specified to the contrary, the property values given have been established on standardized test specimens at room temperature.

For more information on Covestro products in Medical Applications, please request from your sales support contact our Guidance document: Guidance on use of Covestro products in a medical application.
