Danimer Scientific is an industry leader in creating a natural approach to plastics through sustainable innovation. Danimer Scientific provides manufacturers with PHA and PLA biopolymers that have unique sustainable benefits. PHA is a bio-based polymer that is 100% biodegradable, and PLA is a bio-based polymer that is industrial compostable. Danimer Scientific PHA is FDA compliant for use in food-contact applications. With engineers ready to customize formulations for specific needs, the application opportunities are endless!

APPLICATION EXAMPLES

• Snack packaging
• Consumer goods packaging
• Beverage and spirit packaging
• Utensils
